

# Ana Seiculescu

[ junior ] web developer

*Hello, I'm Ana, a junior in web development and a construction architect.*

*My studies and work kept me in a close relationship with the computer. Working with architecture software is constantly learning and solving all kinds of problems.*

*Ever since I uncovered my curiosity and passion for web development, it has become an enduring, invigorating, and splendid journey.*

## SKILLS

Soft skills : independent, proactive, teamwork, flexible in responsibilities, communicating  
Technologies I've worked with : HTML, CSS, JavaScript, GIT (version control), GitHub, React.JS  
Technologies I had brief contact with : jQuery, SaaS, NodeJS, APIs, MUI, Bootstrap  
Other technologies: AutoCAD, Photoshop, Archicad

*In my **Portfolio**, you can see what I've done with my learning in projects :*

<https://anaseiculescu.github.io/Portfolio/>

- [Learn CSS: Box Model and Layout, Flexbox and Grid, Responsive Design](#)
- [Learn Git: Introduction](#)
- [Learn the Command Line](#)
- [Learn GitHub: Introduction](#)

freeCodeCamp platform - JavaScript Course

The University of Architecture and Urbanism Ion Mincu, Bucharest - *Master's Degree in Architecture*

OCTOBER 2008 - JULY 2014

Technical High School, Ramnicu Valcea, Romania - *science major*

## EXPERIENCE

Managing smaller projects has taught me to be **independent** and **proactive** while working on larger ones requires **teamwork**. Being part of a small team also meant I had to be **flexible** regarding my responsibilities, and we all took turns **communicating with clients**.

Many aspects of daily work with architecture software help with “computer literacy” and can be applied to software development.

**ARHINET PLUS**, Ramnicu Valcea, Romania - **Architect**

SEPTEMBER 2014 - JUNE 2022

After my internship at this company, I *obtained my signature right* by passing the physical exam based on a portfolio and an interview at the *Romanian Order of Architects (OAR)*.

The job required:

- *discussions with clients* at the initiation of a project and during the project;
- *teamwork* in elaborating written and drawn pieces of architecture (memoirs, design plans sections, facades, renderings) to obtain approvals and building authorization;
- *collaboration with other specialties* in the field: designers, and construction companies;
- *visiting the construction sites* and interacting with the builders.
