# Ana Seiculescu

[ junior ] web developer under construction

---

*Hello, I'm Ana, and I've decided to change my career.*

*My studies and work kept me in a close relationship with the computer. Working with architecture software is a constant process of learning and solving all kinds of problems.*

*After some research, my curiosity took me where I discovered that I enjoy learning and applying knowledge in programming.*

*I'm only at the beginning of my journey to learn about this world, and it feels like it's a huge, challenging, but beautiful universe here to discover and learn about.*

---

## SKILLS

Managing smaller projects has taught me to be **independent** and **proactive** while working on larger ones requires **teamwork**. Being part of a small team also meant I had to be **flexible** when it came to my responsibilities, and we all took turns **communicating with clients**.

Many aspects of daily work with architecture software help with “computer literacy” and can be applied to software development.

Technologies: HTML, CSS, JavaScript, jQuery, SaaS, NodeJS, GIT (version control), GitHub  
AutoCAD, Photoshop, Archicad

## EDUCATION

**Front-End Web Development Module 2 (JavaScript) remote course - BIT Academy**  
platform (Prof. Lucian Cornianu) - *Certificate of Completion*

**Front-End Web Development Module 1 (HTML/CSS) remote course - BIT Academy**  
platform (Prof. Lucian Cornianu) - *Certificate of Completion*

**Learn JavaScript - Codecademy** platform (online course) - *Certificate of Completion*

**The University of Architecture and Urbanism Ion Mincu, Bucharest** - *Master's Degree in Architecture*

OCTOBER 2008 - JULY 2014

**Technical High School, Ramnicu Valcea, Romania** - *science major*

SEPTEMBER 2004 - JULY 2008

## LANGUAGES

- English
- Spanish
- French

## EXPERIENCE

**ARHINET PLUS, Ramnicu Valcea, Romania** - **Architect**

SEPTEMBER 2014 - JUNE 2022

After my internship at this company, I *obtained the right of signature* by passing the physical exam based on portfolio and interview, at the *Romanian Order of Architects (OAR)*.

The job required:

- *discussions with clients* at the initiation of a project and during the project.
- *teamwork* in elaborating written and drawn pieces of architecture (memoirs, design plans, sections, facades, renderings) to obtain approvals and building authorization.
- *collaboration with other specialties* in the field: designers, and construction companies.
- *visiting the construction sites* and interacting with the builders.
