Ana Seiculescu

junior web developer under construction

Hello, I'm Ana, and I've decided to change my career.

My studies and then my work kept me in a close relationship with the computer. Working with architecture software is a constant process of learning and solving all kinds of problems.

After some research, my curiosity took me where I discovered that I enjoy learning and applying knowledge in programming.

I'm only at the beginning of my journey to learn about this world, and it feels like it's a huge, challenging, but beautiful universe here to discover and learn about.

SKILLS

Managing smaller projects has taught me to be **independent** and **proactive** while working on larger ones requires **teamwork**. Being part of a small team also meant I had to be **flexible** when it came to my responsibilities, and we all took turns **communicating with clients**.

Many aspects of daily work with architecture software help with "computer literacy" and can be applied to software development.

Technologies: HTML, CSS, JavaScript, jQuery, SaaS, NodeJS, GIT (version control), GitHub

EDUCATION

Front-End Web Development Module 2 (JavaScript) remote course - **BIT Academy** platform (Prof. Lucian Cornianu) - *Completion Certificate*

Front-End Web Development Module 1 (HTM/CSS) remote course - **BIT Academy** platform (Prof. Lucian Cornianu) - *Completion Certificate*

Learn JavaScript - **Codecademy** platform (online course) - *Certificate of Completion*

Learn Git: Introduction - **Codecademy** platform (online course) - *Certificate of Completion*

The University of Architecture and Urbanism Ion Mincu, Bucharest - *Master's Degree in Architecture*
OCTOBER 2008 - JULY 2014

Technical High School, Ramnicu Valcea, Romania - *science major*
SEPTEMBER 2004 - JULY 2008

LANGUAGES

- English
- Spanish
- French

EXPERIENCE

ARHINET PLUS, Ramnicu Valcea, Romania - ***Architect***
SEPTEMBER 2014 - JUNE 2022
After my internship at this company, I *obtained the right of signature* by passing the physical exam based on portfolio and interview, at the *Romanian Order of Architects (OAR)*.

The job required:
- *discussions with clients* at the initiation of a project and during the project.
- *teamwork* in the elaboration of written and drawn pieces of architecture (memoirs, design plans, sections, facades, renderings) to obtain approvals and building authorization.
- *collaboration with other specialties* in the field: designers, and construction companies.
- *visiting the construction sites* and interacting with the builders.
